Business Focus

Providing premium minecraft servers for a low cost. MCPProHosting strives to provide top notch quality servers and support, so you can spend less time fixing your server and more time playing. We make sure to cater to each and every customer. MCPProHosting, servers done the right way.

Issue

MCPProHosting needed high-quality Minecraft-focused hosting solutions.

Solution

Phoenix NAP

Result

MCPProHosting has continued to expand its business through Phoenix NAP's colocation services, dedicated servers and cloud-based offerings.

Challenge

As an unmanaged Minecraft hosting provider, MCPProHosting was looking to supply high-quality Minecraft hosting solutions and services to its end users. This involves ensuring optimum up-time and blazing fast performance speeds, two important factors MCPProHosting was looking to fulfill.

Solution

Phoenix NAP's low cost solutions, high levels of redundancy and wide range of products and services, including its premium BGP routed bandwidth and 1Gbps public and private network connection options made MCPProHosting's decision to utilize the world-class data center and Infrastructure-as-a-Service provider an easy one.

Phoenix NAP's extreme redundancy coupled with readily available support teams ensured that the Minecraft hosting provider's services remain online 24x7 while the data center's solutions also allow it to expand its business endeavors as needed through Phoenix NAP's colocation services, dedicated servers and cloud-based offerings.

Benefits

Initially MCPProHosting utilized Phoenix NAP's dedicated server options to assist in the launch of its business. Able to scale with the company as it continued to grow and expand, the dedicated server solutions

enabled MCPProHosting to look toward the future, and other potential service options. Today MCPProHosting is looking forward to migrating some its systems into Phoenix NAP's colocation services, which will ultimately allow it to cut long term costs.
