DATA SECURITY CLOUD
Advanced

Keep your data safe on a battle-ready cloud platform that integrates with Managed Detection and Response technology from **Alert Logic**.

Here's what Data Security Cloud does:

✓ Protects you from Zero-Day and Advanced Persistent Threats (APT)

✓ Leverages Alert Logic's Managed Detection and Response platform

✓ Backs up your data using Veeam

✓ Helps you meet compliance requirements

✓ Eliminates CapEx costs

✓ Ensures top-notch performance

What is Data Security Cloud?

Data Security Cloud is a multi-tenant cloud platform that leverages industry-leading security technologies to provide comprehensive data protection and compliance-readiness. The Managed Detection and Response layer powered by Alert Logic gives you full visibility into your infrastructure and takes data safety to a new level.

**Zero-trust policies.
Zero risk of data loss.**

Data Security Cloud Advanced Features

ALERT LOGIC®

Built through strict virtualization and network segmentation controls, Data Security Cloud provides a secure foundation for building a compliant infrastructure. Its advanced security capabilities are powered by proven, industry-leading software and hardware technologies to ensure data protection on every level – storage, network, and endpoint. **Managed Detection and Response** by Alert Logic is one of the critical layers ensuring security, providing advanced threat analytics for proactive protection.

- ✓ Network Micro-Segmentation
- ✓ Storage (multiple tiers)
- ✓ Bandwidth and IPs
- ✓ Endpoint protection
- ✓ Alert Logic MDR
- ✓ Anti-virus scanning

- ✓ Vulnerability scanning and remediation intelligence
- ✓ Comprehensive reporting
- ✓ Always-updated threat risk intelligence
- ✓ 24/7 threat detection & incident management
- ✓ Expert SOC support
- ✓ Machine learning and behavioral analytics

Data Security Cloud Advanced is available as an **on-demand model**, eliminating the need for CapEx investments. Get in touch with us at **partner@phoenixnap.com** for more details. We will get back to you within one business day!

Managed Detection and Response

As the industry's first Managed Detection and Response (MDR) service, Alert Logic's technology provides a critical security layer in Data Security Cloud. Analyzing 60 billion log messages each day, it offers in-depth visibility into your infrastructure, minimizing the risk of a breach. Alert Logic enables Data Security Cloud to provide **advanced threat intelligence** to protect you from even the most sophisticated threats.
